REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art fails to teach and/or fairly suggest an angular velocity sensor comprising a weight part, a pair of driving electrodes for applying driving voltages for oscillating the weight part in a first direction, a pair of monitor electrodes for monitoring the oscillation of the weight part in the first direction, a self-oscillating circuit for generating first and second driving voltages in opposite phase to be applied to the pair of driving electrodes, a pair of C/V (static capacitance/voltage) converting circuits for generating voltages proportional to the static capacitance of capacitors formed by the monitor electrodes and the weight part, and a differential amplifier circuit for providing a feedback voltage to the self-oscillating circuit from the voltage difference of the output voltages of the C/V converting circuits, wherein a switch is provided for selecting the first or second driving signal, and an adding circuit adds a signal proportional to the amplitude of the selected driving signal to the voltage difference outputted by the differential amplifier circuit. The prior art also fails to teach and/or fairly suggest a method for adjusting the amplitude of the selected driving signal that is inputted to the adding circuit using a lock-in amplifier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Claims 1 and 2 are allowed.
